

My husband and I drive a semi across country. We listen to our xm radio to keep up with all the news at home and abroad. We also depend on our xm radio to keep us informed about all the new laws that would impair our livelihood. The NAB is trying to block xmradio from broadcasting the local weather. This has in a short amount of time become very important to all the us highway travellers. We know in advance which areas of the country we need to be watchful of. Being a lifelong resident of Oklahoma (Tornado Alley) we know just how important this information can be. We cannot depend on our other radio to keep informed. We would have to search to find a station then hope to keep a good signal to hear the reports. With the xmradio, we just punch one button and we can listen to the reports long before we get to the bad area so we can make plans to avoid that area if necessary. Please reject the NAB request. We desperately need to keep up with all the news/weather reports.

Thank you for your consideration and please remember truckers are important people too.
